

### March 2004

This month the emphasis is on the many resources that can be accessed in print or on web sites that deal comprehensively with life issues. What is meant by “life issues”? Basically it covers all issues of public policy that impact on the welfare of families and on the right to life of individuals no matter their size, stage of development, race or gender. There is nothing more basic and more precious than life. All other concerns, worries, hopes and rights derive from the truth and reality of this first principle.

Martin Luther King Jr. made a plea for honesty and the duty to act with an informed conscience:

*Cowardice asks the question ‘Is it safe?’; expediency asks the question ‘Is it politic?’; vanity asks the question ‘Is it popular?’; but conscience asks the question ‘Is it right?’ and there comes a time when one must take a position that is neither safe, nor politic, nor popular, but because - conscience tells one it is right.*

He may have been referring directly to the plight of black Americans and their lack of full civil rights in the decade of the Sixties, but the statement applies no less to the struggle to win respect and protection for the right to life of all human beings.

The demands of the school curricula offer many opportunities to teach about life issues. There may be a more obvious connection in high school courses, but there are opportunities at the elementary panel as well.

A letter designation appears after each website description. This letter indicates the recommended grade level of the material to be found at that site: *E* = elementary, *S* = secondary, *C/U* = college/university.

The material has been divided as to topic: general sources for news and information on abortion and the culture of death, marriage & family, population issues, bioethics/stem cell research/cloning, women’s perspective.

### Section 1 Reliable Sources for News and Information

choices and alternatives to them, an article that summarizes where churches stand on abortion, a link with a South African based pro-life group. One of their best links is called “Links for Life”. An excellent essay on Simone de Beauvoir as the “mother” of the abortion movement. It puts into plain words the harm of her atheistic, existential, secular philosophy. There are other excellent articles on important 20th century writers like Simone de Beauvoir who had

anti-life views. *S, C/U.*

**[www.pfli.org/](http://www.pfli.org/)**

This site hosted by Pharmacist for Life dispenses vital information on the ongoing efforts to combat anti-life forces operating in the pharmaceutical field. *S, C/U.*

Includes an article on how English teachers can use literature to teach about pro-life themes. Especially effective is Jeff Koloze’s article entitled “*A Pro-life Character*”. Another essay deals with Cultural Criticism. He makes a point about a pro-life poet Jean Blackwood: “one of those writers who have been marginalized by fellow feminists who, unlike her, are anti-life in philosophy. Blackwood’s understanding of the forces behind abortion makes us aware of who is oppressed — and who oppresses — within Western cultures.” *S, C/U*

**[www.firstthings.com/ftissues/ft9601/reviews/briefly.html](http://www.firstthings.com/ftissues/ft9601/reviews/briefly.html)**

This is the web site of the magazine *First Things*, foremost journal covering religion and the public square, published by Richard John Neuhaus. A feature of the magazine is its book review section. It inevitably offers some of the best, insightful reviews of important new books. A sample of what one can expect to find in its pages are the following excerpts from reviews:

One of the books reviewed in the magazine dealt with the Catholic novel: *The Modern Catholic Novel in Europe* by Theodore P. Fraser (Twayne Publisher). In his straightforward, surehanded account of the Catholic novel after the late 1800’s, Prof. Fraser analyzes the novels of the well-known British Catholics Evelyn Waugh and Graham Greene and the novels of the Continental Catholics like: Bernanos, Mauriac, Green, Chesbron. The study also contains a chapter on Scandinavian and German Catholic novelists Undset, Le Fort, and

Langgasser. The book remains what the Twayne World Authors Series is supposed to provide: a useful handbook and introduction for students and interested amateurs.

*The Mad Among Us.* By Gerald N. Grob. Harvard University Press. 386 pp. \$16.95 paper. An admirably comprehensive account of the history of the care of the mentally ill in the United States, more admirable for the modesty of its claims. The delusive pursuit of a “cure” for mental illness, says the author, led to the exaggerated claims for institutionalization in the last century and, since World War II, has contributed to the de-institutionalizing policies that have left innumerable “homeless” wandering the streets of America. Grob, professor of history at Rutgers, comes up with no solution, except perhaps for recognizing that there is no definitive solution for the problems of a population that continues to have a moral claim upon the rest of society. *S, C/U.*

[www.firstthings.com/ftissues/ft9608/reviews/music.html](http://www.firstthings.com/ftissues/ft9608/reviews/music.html)

An essay appeared in a very recent edition of *First Things* tackling classical music and the abortion issue, and offering an interesting take on the difficulty of mixing music with this life theme. Might be useful for a discussion in music courses on what are appropriate topics for musical compositions. *S, C/U.*

[www.standupgirl.com](http://www.standupgirl.com)

[www.geocities.com/Athens/Academy/6591/donum](http://www.geocities.com/Athens/Academy/6591/donum)

The site presents well-reasoned Catholic philosophical explanations on why abortion, euthanasia, capital punishment and suicide are morally wrong. *S, C/U.*

[www.peopleforlife.org/brochure.html](http://www.peopleforlife.org/brochure.html)

One can access the site as a source of brochures and pamphlets on abortion and a wide range of right to life topics. *S, C/U.*

[www.cpforlife.org/](http://www.cpforlife.org/)

The site offers good material and a strong rationale for making pro-life education a must. Since the decision of *Roe v. Wade*, tens of millions of Christian school students could have received a Pro-Life education. This group would today constitute a huge voting block; and with them, the culture of death might have already been defeated. *S, C/U.*

“The Pro-Life movement has worked tirelessly, attempting to change the hearts and minds of adults in the voting booth and in government. However, this is addressing the problem *after* the damage has been done. Simultaneously, children’s hearts and minds are not being properly cultivated in the truth of the sanctity of life while in Christian school. The result is that Christian schools continue graduating more voters and

future government leaders whose record of defending life is no better than the national average. This sad reality is made evident with every election (see below) and with every legislative session. This self-defeating cycle must stop, as it is one of the main underlying reasons why we have not yet ended the scourge of abortion and the growing attacks against the sanctity of life. There is a strategy that can and should be followed. If a student graduates with perfect grades, but does not have a solid understanding of the sanctity of Life and his personal obligation to defend Life, we have failed him and our Lord miserably. There truly is no valid reason why teaching the sanctity of life should not be mandatory in all Christian schools, bible study, and CCD programs across the nation and around the globe. The Christian world has everything to gain. It is only the culture of death that has something to lose. Politics alone cannot succeed. Education of school students is the key.”

### Section 4 Bioethics/Stem Cell Research/ Human Cloning

[www.foet.org/anti-cloning.htm](http://www.foet.org/anti-cloning.htm)

The web site for the *Anti-cloning Initiative*, offering leftist/liberal views against cloning. Thus, at least on this issue the “left” is making common cause with “social conservatives”. It is a refreshing point of view, contrary to the usual alignment of political factions. S, C/U.

[www.globalchange.com/davidw.html](http://www.globalchange.com/davidw.html)

This site deals with many issues and the “future”. Although rich in material, the site should be used only with guidance. There is no discernible pro-life stance to the anti-cloning arguments presented in the papers, articles and videos. For example, Dr. Patrick Dixon’s practical reasons against cloning includes: **Health risks** from mutation of genes - an abnormal baby would be a nightmare come true; **Emotional risks** - a child grows up knowing her mother is her sister, her grandmother is her mother; **Risk of abuse of the technology** - what would Hitler have done with cloning technology if available in the 1940s? There are powerful leaders in every generation who will seek to abuse this technology for their own purposes. S, C/U.

[www.reproductivecloning.net/](http://www.reproductivecloning.net/)

The site for *The Reproductive Cloning Network*, primarily in favour of human cloning of all types. These folks take a very liberal, laissez-faire stance on the whole issue. There is nothing but good things to come from such scientific research according to them, and besides it is also inevitable! It is a strong site in favour of cloning. The only reason to use it is simply to become familiar with the philosophy and arguments used by those in favour of cloning. *S, C/U.*

[www.catholiceducation.org/](http://www.catholiceducation.org/)

A solid site with links to many other pages specializing in certain moral topics. It also offers a comprehensive presentation of core subjects and issues currently in the news (abortion, euthanasia, cloning, bioethics, pornography, parentin, family, media, etc.). It is frequently updated. *S, C/U.*

[www.bioethics.net/](http://www.bioethics.net/)

Another liberal site dealing with the whole area of bioethics and their application to a host of issues and topics. It argues for an openended approach to all type of research and application of biotechnological breakthroughs. Not a recommended site, but illustrates the way that a utilitarian philosophy works in this field. *S, C/U.*
